Summary

Project Status Summary
The project is progressing as planned, with adjustments made to the timeline due to delays in November and December. The team has rescheduled key development tasks for January and February to accommodate these delays while ensuring that all critical milestones will be met by the March 27, 2025, deadline. Despite the delays, the overall scope and objectives of the project remain achievable with the revised timeline. The focus in the upcoming period is to enhance the customer and driver platforms, integrate necessary third-party services, and continuously evaluate the design to ensure the project meets user expectations and is delivered on time.

Accomplishments As Planned	Planned but not Accomplished
Initial Planning and Coordination: Completed team coordination and planning as scheduled.	Payment System Integration: Integration of the third-party payment solution was delayed.
Scope and Objective Definition: The project's scope, objectives, and overall structure were defined and approved.	Testing and Quality Assurance: Testing and quality assurance activities did not begin as planned due to resource constraints.
Milestone and Deliverable Outline: Milestones and deliverables for the project were outlined, ensuring clarity of expectations.	Order History Feature: The development of the comprehensive order history feature was pushed to the next phase due to prioritization of core platform functionalities.
Team Task Allocation: The team was organized, with clear assignments made for the development and integration tasks.	Profile Settings Refine: Refining the profile section with advanced settings was delayed due to higher priority tasks, such as navigation and payment system integration.
